

Personalised Therapy at Home
At The Touch Of A Button

evolV

- A pioneering CE marked and clinically validated virtual therapy platform which augments traditional therapy services
- Uses Motion Capture Technologies + VR + Gamification to make rehabilitation more engaging and enjoyable
- Employed in hospitals, clinics, day centres, care homes and patients' homes
- Used in 350 rehabilitation centres in 20 countries since 2012
- Clinically validated in 7 countries
- Interoperability with different EPR/EHR platforms and other management systems
- Microsoft Partner and member of the Microsoft Global Social Entrepreneurship Program

EvolvRehab is being employed to treat persons of **all ages and levels of disability** and for a **wide variety of pathologies** including:

- ✓ Stroke
- ✓ Parkinson's
- ✓ Multiple Sclerosis
- ✓ Dystrophies
- ✓ Spinal Cord injuries
- ✓ Traumatic Brain Injuries
- ✓ Cerebral Palsy
- ✓ Frailty - Fall Prevention
- ✓ Healthy Ageing
- ✓ Dementia
- ✓ Post-Covid conditions

The Evolv RehabKit^{CE}

evolv

The CE certified Evolv RehabKit includes all the hardware necessary to provide personalized virtual rehabilitation services in clinics and in patients' homes. It **incorporates the Azure Kinect** for precise body tracking and a powerful mini pc for the best user experience.

The **simple one-button start system** means that no technology experience is required and allows patients of all ages and levels of disability to have **greater autonomy** when choosing when to do their rehabilitation.

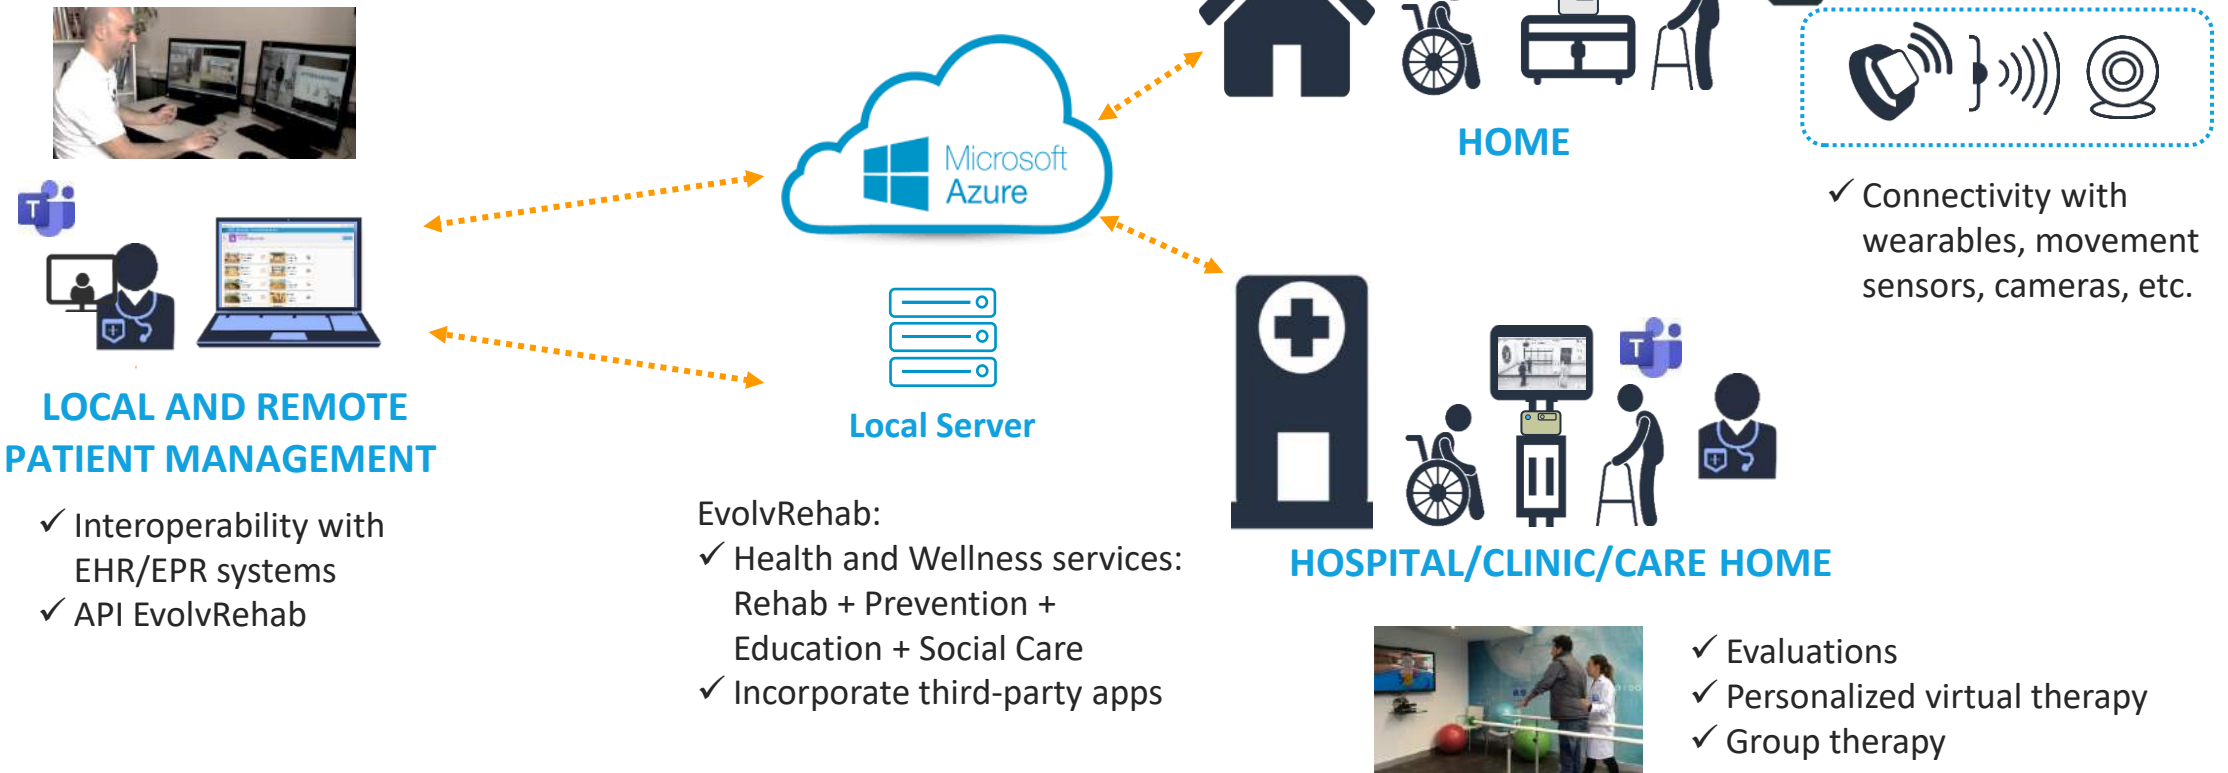

How EvolvRehab® Works

- ✓ Personalization of care plans by therapists based on assessments (face-to-face and/or remote)
- ✓ Follow-up of adherence + user performance
- ✓ Periodic appointments by videoconference
- ✓ User progress reports

- ✓ Personalized virtual therapy
- ✓ Educational content / training for caregivers
- ✓ Telecare through videoconference
- ✓ Access to digital information content

EvolvRehab® Around The World

“As a partner it is great to see that the patient is doing something beneficial for themselves and doing it alone.” (carer)

EvolvRehab® offers healthcare providers with a solution that **increases the amount of therapeutic activity** patients have access to right in their home. Greater access leads to more patient autonomy, improved patient outcomes and reduced healthcare costs.

EvolvRehab® has been used in 9 countries to provide telerehabilitation services including: UK, Germany, Italy, Australia Russia, USA, Chile, Argentina, Nicaragua
