

Enabling Remote Rehabilitation Services for Isolated Areas

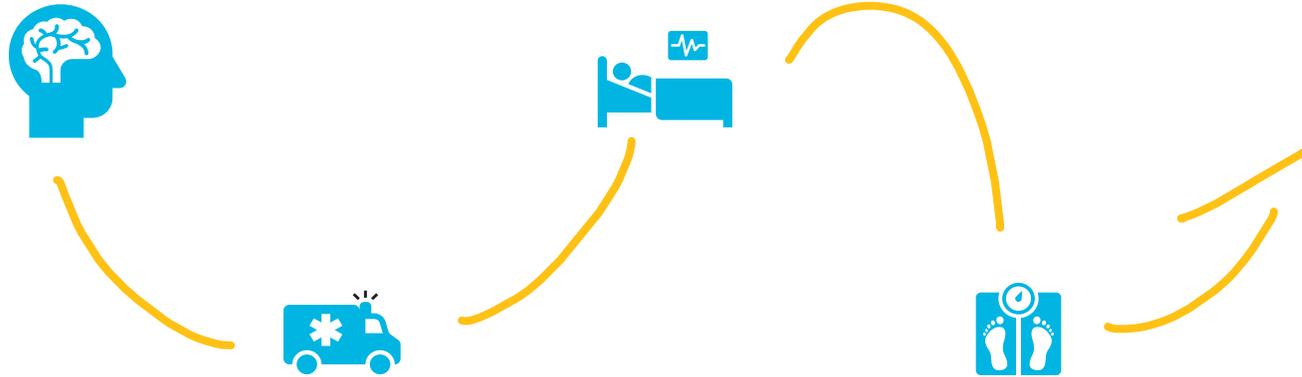

The Patient Journey

Things changed The day that Jean Claude suffered a stroke

The NEW Patient Journey

How would Jean Claude face his health issue using virtual care platforms

Less time to response

Specialists assisting him all the time

Avoid unnecessary trips to the hospital

Access to all his medical records

Ongoing management of his medical condition

SOLO™ Virtual Care Platform as the new alternative

SOLO™ is part of a Virtual and Care Delivery Network

Corporate brand

Our corporate brand reflects our business' heritage, values, culture, people, and strategy.

Integrated and scalable virtual care experience

Designed to scale for enterprise virtual care strategies, our platform ensures greater access to high-quality care and better health outcomes – enabling a connected care experience:

- A fully integrated, reliable enterprise platform
- Industry-leading support
- Extensive national provider network

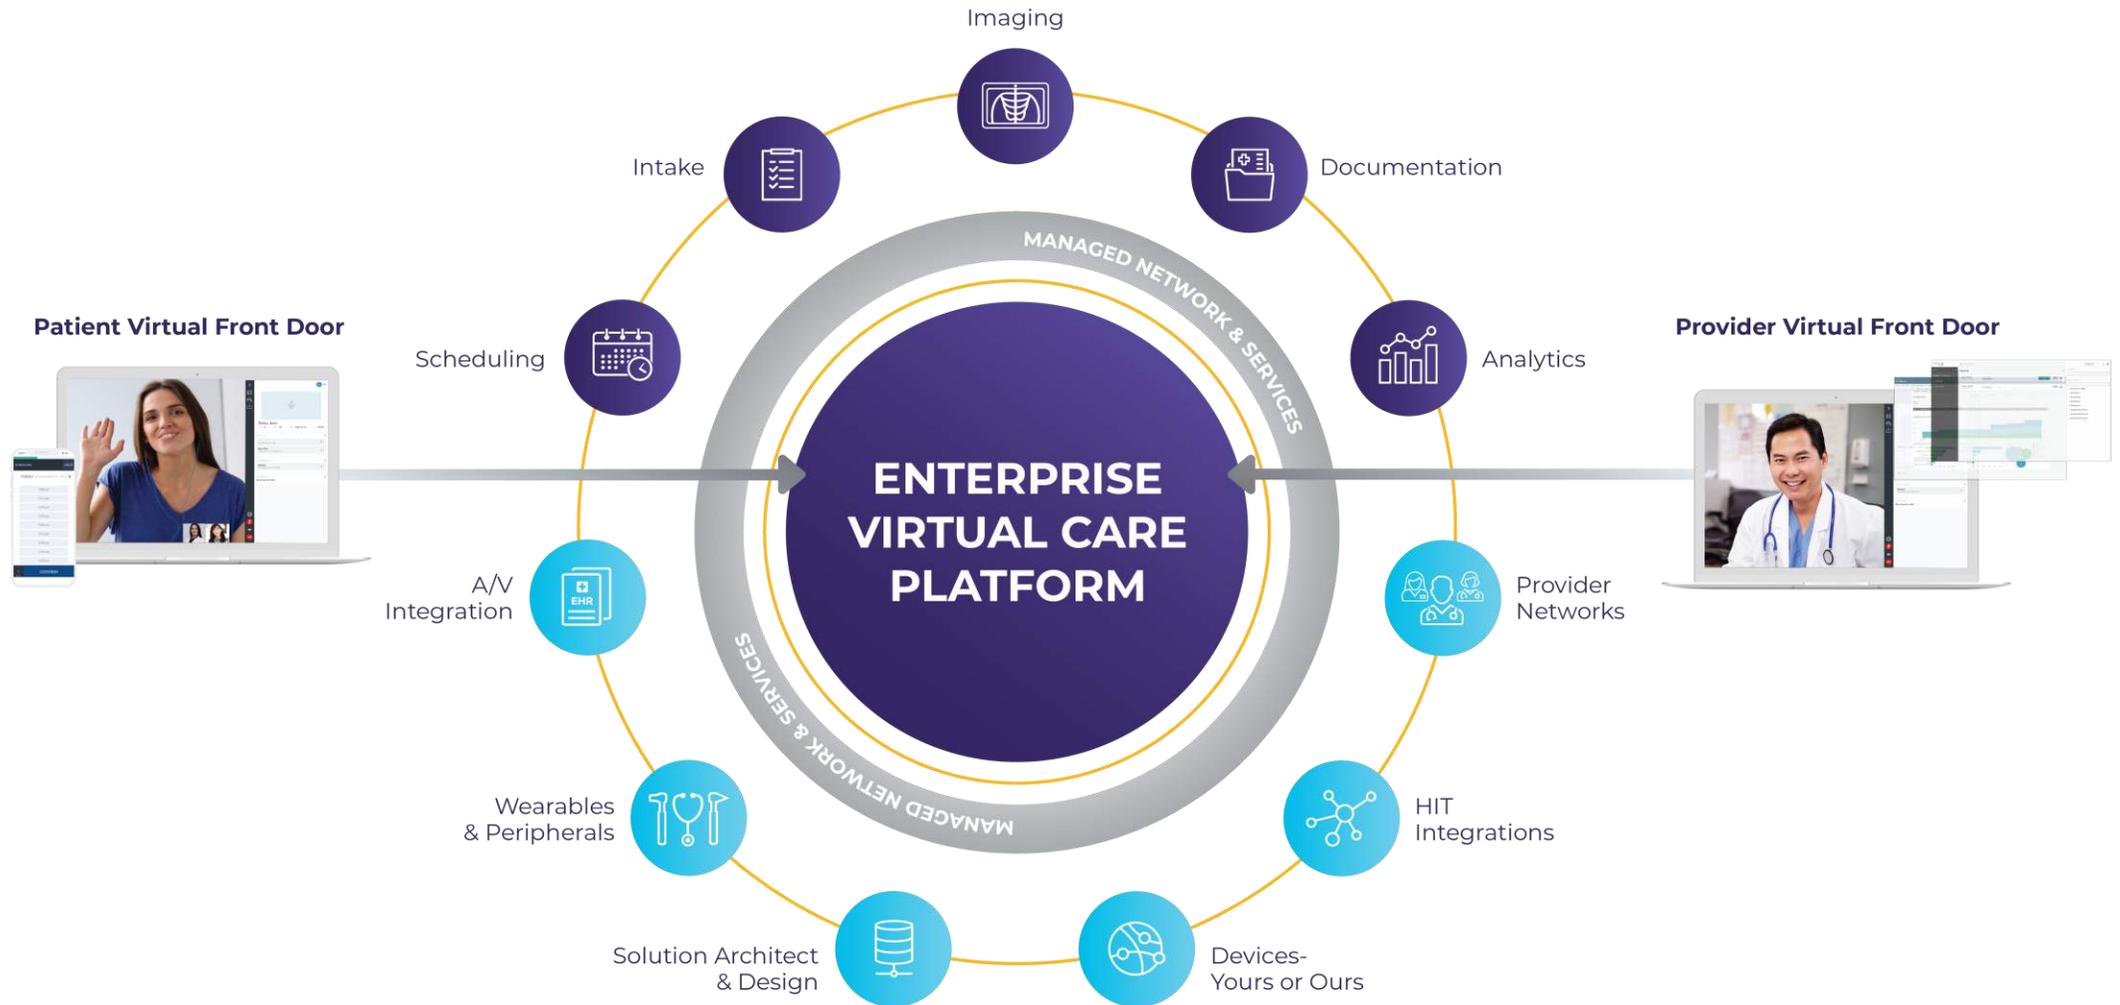

Leverage your provider network of choice:

- Teladoc Health Medical Group
- Your providers
- Optional secondary network

SOLO™ Virtual Care Platform as the new alternative

SOLO™ is part of a Virtual and Care Delivery Network

Designed to mirror the way you work, not change it

Our configurable software modules enable clinicians to view the patient's continuous care journey, rather than by each episode of care — all on a single interface.

Close workflow gaps around patient intake, scheduling, documentation, image access, and analytics to create a solution that meets your unique needs.

Enabling Powerful Clinical & Administrative Workflows

Systems integration and interoperability

Solo™ is the backbone to delivering seamless care to any patient without sacrificing quality of care continuity.

Designed to integrate with your virtual care delivery framework for quick user adoption and program growth.

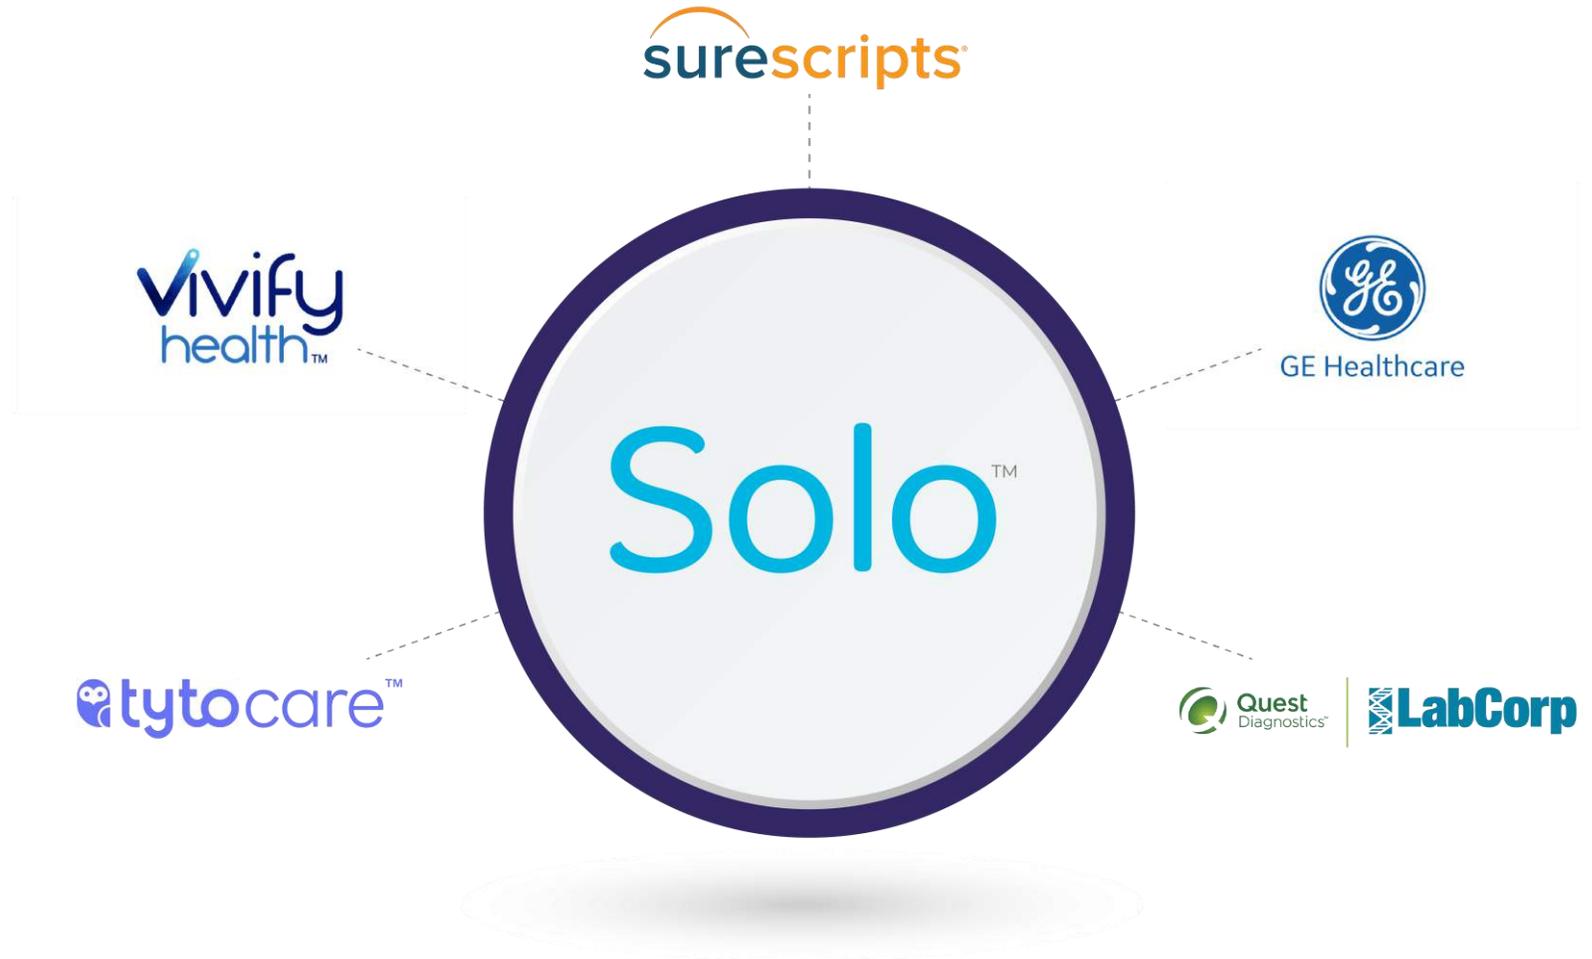

Integrated healthcare solution

Optimized for EHR interoperability

Architected for exchange

Interoperability extends into interfacing with third-party applications into one place with APIs, HL7 integration, scheduling, eligibility confirmation, e-prescriptions, patient surveys, payments and digital signatures.

Network configuration and optimization service

The process is simple, the implementation smooth, and the satisfaction guaranteed

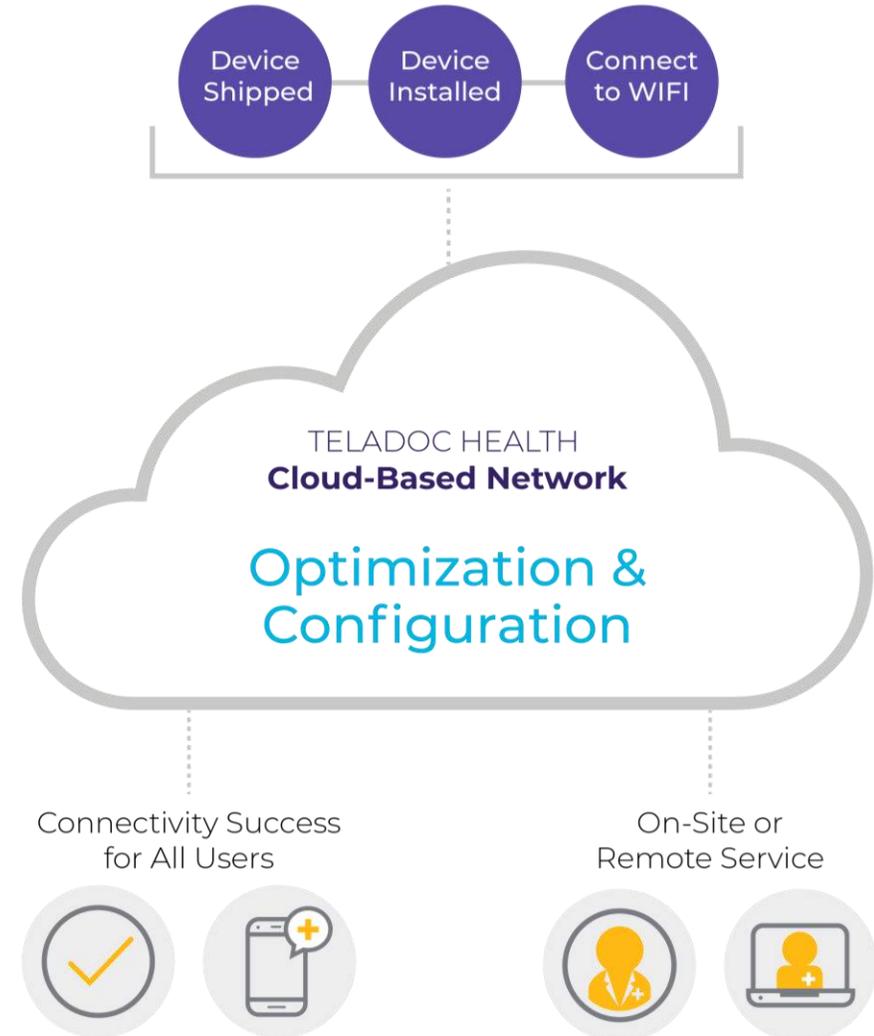

Successful outcomes require optimal network connections.

With over 15 years experience and in more than 2,000 healthcare locations, Teladoc Health has the expertise to build or grow your telehealth network.

Assessments include:

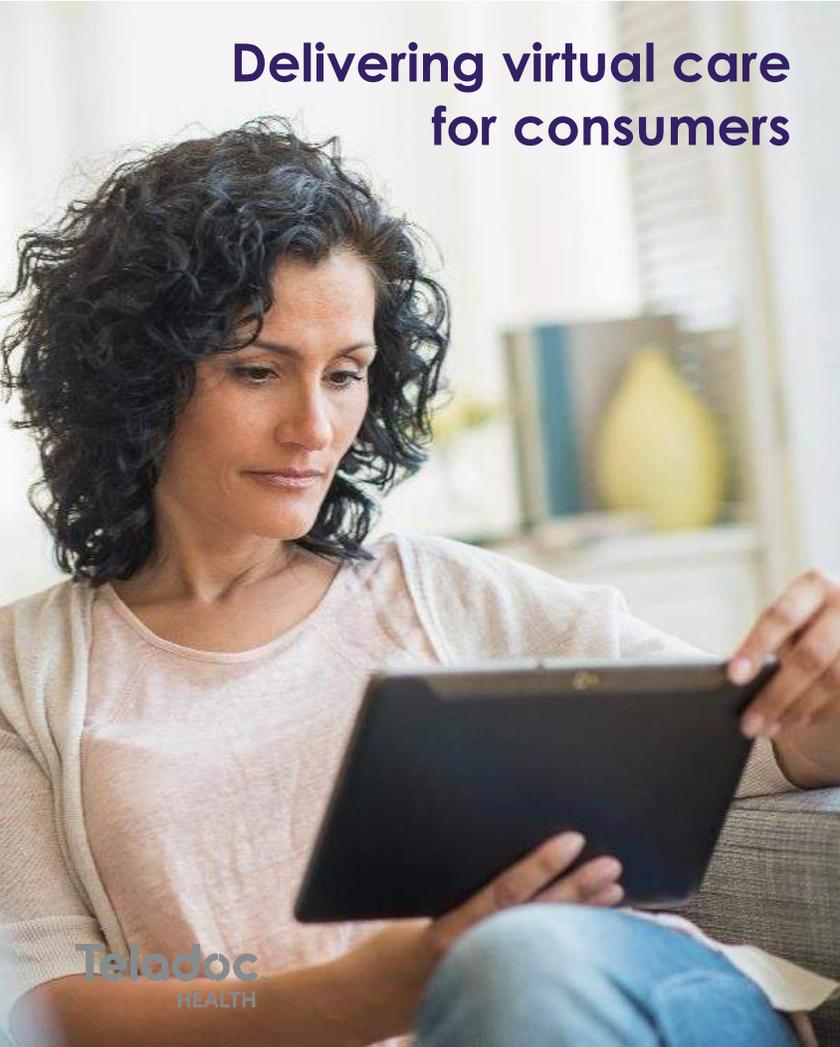

- Ensure your telehealth solution conforms to Teladoc Health Network Specifications
- Bandwidth utilization, latency, jitter and packet loss
- Environmental interference and wireless coverage in care area
- Local network traversal to the InTouch cloud

We partner with you to not only meet your standards for security, reliability and stability, but exceed them.
