Healthcare Benefits

- Reduce emergency admissions through early detection of deterioration
- Leverage remote monitoring to facilitate early discharge
- Optimise care delivery by concentrating on those in need
 - Needs-based care instead of a fixed schedule for each service user
- Leverage family to assist with monitoring even if they live remotely
- Provide evidence of care needs to family
 - Prompt them to put additional care services in place
- Use dashboard assessments in place of in-person consultations to save time
- Speed up triage by having movement history to hand
