Experts in Digital Health & Software as a Medical Device

Our team has built [highly-effective](#) Digital Health and Rehabilitative Care solutions for [world-renowned](#) healthcare institutions.

Meet Linda – Consultant in Rehabilitation Medicine

“

Sarah is a patient of mine from Belmullet, Co. Mayo, Ireland. She is 47 years old and is one of 120,000 people in Ireland living with moderate or severe disability caused by brain injuries.

I would like to introduce a personalised digital health solution to connect with patients in remote areas like Sarah to empower them to self-manage their care, remind them of upcoming appointments and give our care team visibility of patient progress with their rehabilitation outside the four walls of a clinic.

■ Linda has a Problem.

Building digital health solutions is hard. _____

Expensive

€380,000

on average to build

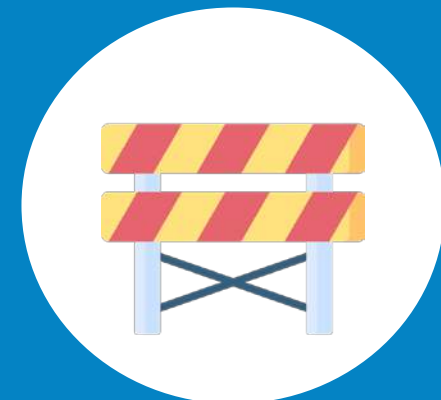

Time-
consuming

15 months

on average to build

Restrictive

Existing solutions are
condition-specific and
not very customisable.

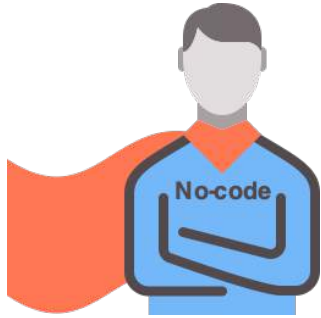

Say hello to the **Companion Platform**.

“

Using Zendra's proven technology, in just a few clicks, the Companion Platform will deliver **personalised rehabilitation** to acquired brain injury patients at the comfort of their own **home** whilst giving care teams **visibility** of patient progress outside the four walls of a clinic.

How it works

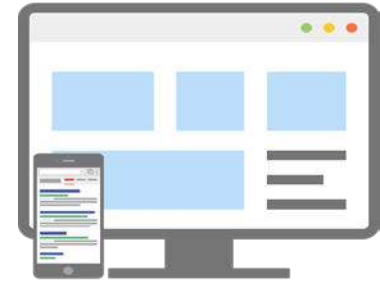

No-code platform

Using Zendra Health's no-code platform, patient-centric health apps can be created in minutes, not months.

Insights

Our platform provides insights to track performance and outcomes measures.

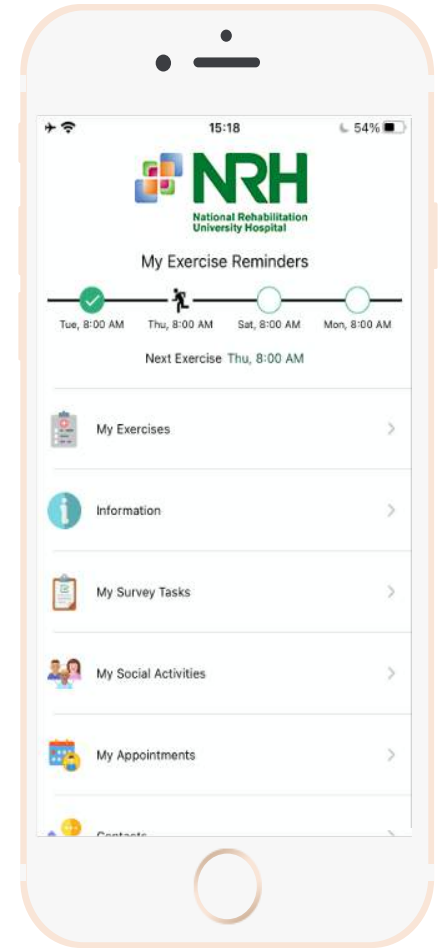

Content Management System

Our platform's intuitive Content Management System allows you to create new care plans, educational materials, engage with service users and customise health app content instantly.

Digitalised Personalised Care. Made Simple.

It takes on average **15 months** to build a digital health solution.

Using the Zendra Health Platform, we can co-create a personalised digital health solution for patients like Sarah in just **1 day**.

How it works

How does Zendra Health help Linda build a digital health app?

How it works —Step 1: Co-create solution

Similar to building a burrito bowl at a burrito restaurant, the Zendra Health platform behaves in the same way. You get to pick and easily configure the components you want in your health app.

BUILD YOUR OWN

1 Choose Your Template:

Patient Care	Staff Care	Clinical Trial
Communication Pre & Post Surgery	Staff Education & Notifications	Pharma Based Trial

2 CHOOSE YOUR ENGAGEMENT

- Care Plan
- Telehealth
- Activity Goal
- Reminders
- Incentivization
- Push Notifications
- Insights
- Wearable Integration

3 CHOOSE YOUR WORK-FLOW

- Survey
- Appointments
- Contacts
- Symptom Tracker
- eConsent
- Calendar
- Mood Journal
- Physical Assessment

4 CHOOSE YOUR EDUCATIONAL

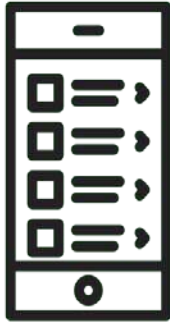

- DIY Content
- Document
- News Feed
- Web Site
- Video

5 CHOOSE YOUR MARKETING

- Branding
- Promotional Campaign
- Loyalty Program

How it works - Step 2: Solution Roll-out

Option 1 – Non-Medical Grade

Roll-out within **1 day**

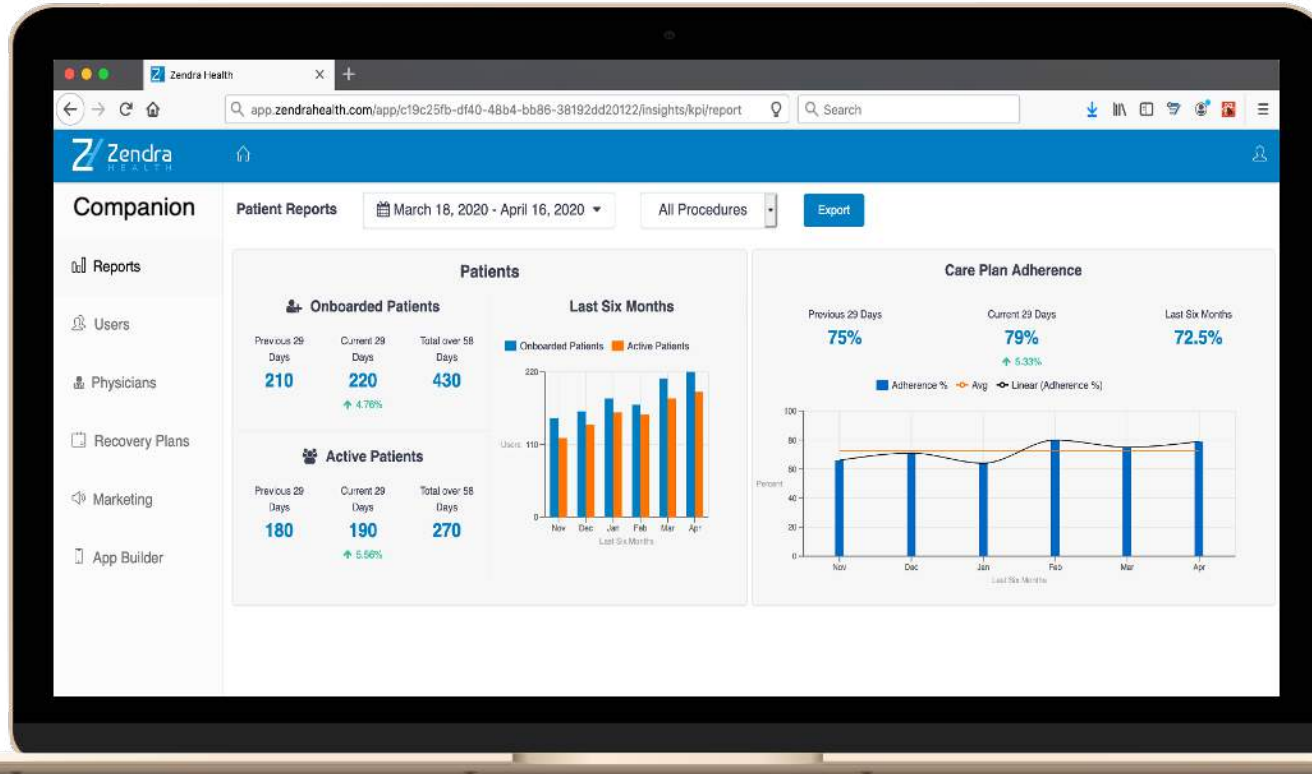

Option 2 – Medical Grade

Reduce complexity and time-to-market by **12 months.**

How it works – Step 3 – Get the bigger picture.

Care team can check remotely in on service users from the clinician dashboard and swiftly determine if any further intervention is required.

Award-winning proven technology

Zendra Health is an **award-winning** medical technology company you can **trust** for your digital health solution needs.
