

Risk Indicators and Digital Therapeutics for At-home Telerehabilitation of Stroke

Chronic Disease Prevention Platform

- StrokeDetect™, CardiacDetect™, and HypertensionDetect™ modules are AI-powered risk indicators
- StrokePrevent™, CardiacPrevent™, and HypertensionPrevent™ for telerehabilitation

- Work with National Rehabilitation Hospital, Dublin to deploy a remote monitoring and telerehabilitation programme for post discharged at-home stroke patients. Currently our platform is only deployed in long term care facilities.
- Work with National Rehabilitation Hospital, Dublin to license out and develop features such as exercise tracking in the stroke telerehabilitation programme

“Together, let us prevent chronic diseases
and revolutionize healthcare “
