

**2CARE4EU**

**Developing  
innovative  
care solutions  
through PCPs**

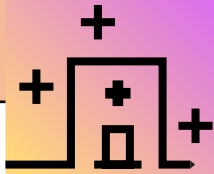

The healthcare sector is currently shaped by urgent challenges: ageing population, comorbidity, chronic illnesses, patient's isolation and hospital reduced capacity.

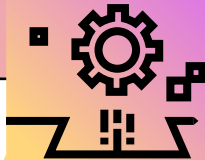

The **2CARE4EU** Cluster aims at developing innovative healthcare ICT-based solutions, codesigned with citizens and health care professionals. The solutions are aimed at improving the treatment of chronic diseases, rehabilitation in remote areas, predictive

analysis for frailty prevention and integrated care solutions addressing multimorbidity challenges.

The main solutions proposed by the **2CARE4EU** Cluster are the following:

Methodologies to radically improve hospital discharge, collaboration efficiency, patients' experience in the care system, and other care transitions

ROSIA Innovation Ecosystem: Open Platform, Developer Layer, Catalogue to address rehabilitation in isolated areas through supervised self and community care

Disruptive digital solutions for the comprehensive management of older adults' health

Innovative solutions to enhance predictive care and treatment of multimorbidity

**Join us and find out our innovative solutions PCPs to shape the future of healthcare services provision.**
